Global Perspectives Course

Science goes Policy

Nadja Ziebarth, Dr. Jannis Kuhlmann, Dr. Bettina Taylor

BUND Friends of the Earth Germany, Bremen (https://www.bund.net/meere)

26 September 2024
09.30 – 13.00 hrs.

Objectives

In this course, Nadja Ziebarth, AWI alumna Bettina Taylor and MARUM alumnus Jannis Kuhlmann from the BUND will share their insights into marine environmental policy. Using practical examples, participants will gain insights into marine environmental policy and how, when and why scientific findings can play a role.

Topics

- Introduction of the BUND – Friends of the Earth, Germany
- Marine Policy – How does it work? Which processes play a role? When do scientific findings become relevant?
- What influences political actions? What means and timeframes are necessary for this? And what synergies exist between science and NGOs and science and politics?
- With examples from offshore wind farming, the protection of the sea floor, underwater noise, and microplastics

Target Group

Everyone interested

Venue

MARUM, University of Bremen, Leobener Str. 8, 28359 Bremen, Germany
MARUM I (main) building, room 2070
