Professional Development

MARUM Supervision Workshop

Collaborative and Team-Based Supervision

16 May 2025
09.30 – 12.30 hrs.
MARUM III (ZfT), room 2070/2080

Objectives of the workshop series

MARUM aims to provide excellent conditions for the training and professional development of Early Career Researchers (ECR). To ensure a high quality of supervision, we offer support to those responsible ("train the trainer").
The MARUM Supervision Workshops address everyone at MARUM who is involved in the supervision and/or mentoring of ECR. The main objective of the workshops is to ensure high quality in the supervision of ECR and to develop best-practice approaches. In addition, the workshops provide an important opportunity for the community of supervisors and mentors to exchange ideas and experiences.

Objectives of this workshop

In this workshop, we want to discuss practical strategies for fostering collaborative and team-based approaches in (research) supervision. We will talk about challenges and best practices for building supportive supervision teams and navigating the complexities of collaborative supervision in different settings.

Topics could include

- Setting the floor/getting the project off to a good start,
- Monitoring progress,
- Effective and appreciative communication between all parties involved, and
- Collaborative problem solving in multidisciplinary projects.

Target group

Scientists who are involved in the supervision of early career researchers at MARUM or in a project related to MARUM

Registration

In order to be able to plan the resources for this workshop, please register by e-mail with Tina Klose (early-career@marum.de).

If you like, you are welcome to mention topics that are on your mind or for which you are looking for concrete ideas/methods when you register. This will help us to prepare the moderation for the workshop.
