

Join us as we welcome our newest colleagues aboard!

Meet our latest additions to the MARUM crew as they introduce themselves and their previous research, as well as their plans and goals for their work at MARUM.

This event is a chance to explore the diverse expertise within our research centre, foster collaboration, and chart new paths together as we embark on future discoveries.

Next wave: Tuesday, **18 November 2025** at 09.30 hrs.
in the Pacific Ocean room (Center for Deep-Sea Research)

New crew:

Alexander Alfano, *doctoral researcher (Sedimentology group)*

"Presence, Characteristics, and Dynamics of Estuarine, Tidal, and Marine Dunes in the German Bight"

Francielle Nogueira de Lima Holtz Santos, *doctoral researcher (Global Change Ecology group, ZMT)*

"Coral acclimation to global warming"

Teena Rahangdale, *doctoral researcher (Global Change Ecology group, ZMT)*

"Modelling N₂ fixation by oceanic free-living heterotrophic bacteria"
