

Join us as we welcome our newest colleagues aboard!

Meet our latest additions to the MARUM crew as they introduce themselves and their previous research, as well as their plans and goals for their work at MARUM.

This event is a chance to explore the diverse expertise within our research centre, foster collaboration, and chart new paths together as we embark on future discoveries.

Next wave: Thursday, **18 December 2025** at 09.30 hrs.
in the Pacific Ocean room (Center for Deep-Sea Research)

New crew:

Mark Schürch, *professor (own group)*
Physical Geography and Geomorphology

Michelle Teune, *postdoc (Carbon Sequestration and Glycobiology group)*
Carbohydrate-active enzymes in the marine carbon cycle

Nahja Busse, *doctoral researcher (Microbial Carbohydrate Interactions group)*
Selfish bacteria limit glycan carbon sequestration (SFB TRR 420)

Paul Berndt, *doctoral researcher (Petrology of the Ocean Crust group)*
Rock alteration and hydrothermal processes at Brothers Volcano
